CAREER OBJECTIVE

BCA graduate (GPA 8.85) with hands-on AWS experience from deploying and troubleshooting Dockerized Java applications on EC2. AWS Certified Cloud Practitioner (CLF-C02) and Microsoft Certified: Azure Fundamentals (AZ-900). Seeking an entry-level Cloud Associate / Junior DevOps / Cloud Support Engineer role to apply infrastructure, monitoring and troubleshooting skills and grow into operations work.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, Security Groups, Elastic IP, S3)
Microsoft Azure (Virtual Machines, Regions)
Programming: Java (Core, Spring Boot), SQL, C
Databases: MySQL, Oracle
Systems: Networking fundamentals, Data Structures & Algorithms
AI-Assisted Development: ChatGPT, Codex, Claude

CERTIFICATIONS

- AWS Certified Cloud Practitioner **(CLF-C02)** **Amazon Web Services** View | Verify
- Microsoft Certified: Azure Fundamentals **(AZ-900)** **Microsoft** View | Verify

PROJECTS

Distributed Job Scheduler | GitHub *Oct 2026 – Present*

- Built a MySQL-backed job scheduler (Java, Spring Boot, Flyway) in which multiple worker instances claim jobs concurrently with SKIP LOCKED, so no job runs twice.
- Implemented retries with backoff, a dead-letter state for jobs that keep failing, and lease-based crash recovery that re-queues work from failed workers.
- Benchmarked 5,000 jobs on a laptop: throughput rose from 70 to 556 jobs/s by adding workers and tuning batch size, with zero lost or duplicated jobs.
- Added Prometheus and Grafana monitoring, a 9-step smoke test and GitHub Actions CI (39 tests passing); packaged with Docker Compose behind a Caddy reverse proxy with a public demo API.

URL Shortener | GitHub | View Live Project *Apr 2026 – Sep 2026*

- Built a full-stack URL shortener (Spring Boot 3, Spring Security, MySQL, React) with session-based authentication, BCrypt password hashing and role-based access for user and admin.
- Containerized backend, frontend (Nginx) and MySQL with Docker Compose, using health checks to control start-up order.
- Diagnosed CPU-credit exhaustion on a burstable EC2 instance from utilization metrics and resolved it by right-sizing to a larger instance type.
- Secured the deployment: Security Group limited to required ports, Elastic IP for a stable public address.

Anagram Generator | GitHub | Oct 2025

Core Java app that generates valid English anagrams using multithreading and socket connectivity, with filtering to exclude trivial 2–3 letter words.

EDUCATION

BCA (Bachelor of Computer Applications) *Jul 2023 – Jul 2026*
Sangola Mahavidyalaya, Sangola | **GPA 8.85 / 10**

HSC (Science) *Jun 2022 – Mar 2023*
Sangola Vidyamandir Prashala and Junior College, Sangola

SSC *Jun 2020 – Mar 2021*
Sangola Vidyamandir English Medium School, Sangola

Relevant Coursework: Database Management Systems, Computer Networks, Operating Systems, Object-Oriented Programming, Data Structures & Algorithms

ACHIEVEMENTS

- Won 2nd Prize in Logic League, a college-level coding competition.

SOFT SKILLS & INTERESTS

Soft Skills: English communication, collaboration, ownership, punctuality, flexibility, initiative.
Interests: Cloud infrastructure and System Design.
